Subject: Lynn Canal Hwy (new construction)

Dear DOT Officials,

The most important transportation need in Southeast Alaska is the Lynn Canal Highway and improving the transportation corridor between the Capital City of Juneau and the North American highway system with a road. Please proceed at full speed and get the road built, so we can get on with building Southeast Alaska's economy and our relationship with the rest of Alaska. I would like to see the road go all the way to Skagway but every mile is a step in the right direction. The sooner you start, the sooner you will be finished and Southeast will begin reaping the economic benefit of this investment.
